

Priyanshu Kumar

CSE (AI/ML) Student

+91 8434452638 ◇ priyanshu843445@gmail.com ◇ Patna, Bihar, India ◇ [LinkedIn](#) ◇ [GitHub](#)

SUMMARY

Computer Science Engineering student specializing in **Artificial Intelligence and Machine Learning**, with hands-on experience in **Python, C++, Java, SQL, and web development**. Currently building skills in **Data Structures and Algorithms, Machine Learning, and full-stack development** through academic and personal projects. Interested in applying programming and problem-solving skills to real-world **software and AI/ML projects**.

EXPERIENCE

Artificial Intelligence Intern

SmartED Innovations | 2026

- Completed training and internship focused on **Artificial Intelligence**.
- Worked with basic **Python programming** and explored fundamental AI concepts.
- Gained exposure to **data handling, problem-solving, and AI-based applications**.
- Applied learned concepts through practical internship activities.

Data Science Intern

InternCourse | Jun 2026 – Jul 2026

- Completed a **5-week Data Science internship program** from June 12 to July 18, 2026.
 - Worked with basic **Python, Pandas, and NumPy** for data handling and analysis.
 - Explored **data preprocessing and visualization** as part of Data Science workflows.
 - Developed practical understanding of **data analysis and problem-solving** through internship activities.
-

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science Engineering (Artificial Intelligence & Machine Learning)

COER University, Roorkee | Mar 2025 – Present

Senior Secondary (PCM) — Bihar Board

S.G.D.M College, RPS More, Patna | Apr 2022 – Mar 2023

PROJECTS

Internship & Job Portal for CSE Students

COER University | Feb 2025

- Developed a platform designed to help CSE students explore and access relevant internship and job opportunities.
- Implemented a user-friendly interface for browsing and managing opportunities.
- Applied web development concepts to build a practical student-focused platform.

Drowsiness Detection System | AI + Computer Vision

Personal Project | 2026

- Developed an AI-based driver monitoring system using **Python, OpenCV, and MediaPipe** to detect drowsiness through real-time face and eye monitoring.
 - Implemented **facial landmark detection** and **Eye Aspect Ratio (EAR)** for drowsiness detection, with real-time **buzzer and LED alerts** and Arduino/ESP integration.
 - Built a **Flask-based driver monitoring dashboard** with **GPS support**, integrating hardware components including **Arduino/ESP, L298N, and GPS**.
-

SKILLS

Programming Languages : C++, Python, C, SQL, Java

Web Development : HTML, CSS, Javascript, Flask, Full Stack (learning)

AI/ML & Data Science: Machine Learning, Computer Vision, Pandas, NumPy, OpenCV, MediaPipe

Tools & Technologies: Git, GitHub, VS Code, MySQL, Arduino/ESP, Postman

Core Concepts: Data Structures & Algorithms, OOP, DBMS

Languages : English | Hindi | German(Basic)

CERTIFICATIONS:

Artificial Intelligence Course SmartED Innovations | Mar 2026
